T.W. Flegel and Tirasak Pasharawipas A proposal for typical eukaryotic meiosis in microsporidians 1

ARTICLES

M.M. Doolittle, J.J. Cooney, and D.E. Caldwell Lytic infection of *Escherichia coli* biofilms by bacteriophage T4 12

Yoshiki Iwamoto, In Sook Matsui Lee, Motonari Tsubaki, and Ryo Kido Tryptophan 2,3-dioxygenase in *Saccharomyces cerevisiae* 19

Philip E. Vercoe, Donn H. Spight, and Bryan A. White Nucleotide sequence and transcriptional analysis of the *celD* β-glucanase gene from *Ruminococcus flavefaciens* FD-1 27

L. Simon, B. Bouchet, C. Caye-Vaugien, and D.J. Gallant Pullulan elaboration and differentiation of the resting forms in *Aureobasidium pullulans* 35

C.R. Bell, G.A. Dickie, W.L.G. Harvey, and J.W.Y.F. Chan Endophytic bacteria in grapevine 46

Christian Chauret, Colin I. Mayfield, and William E. Inniss Biotransformation of di-*n*-butyl phthalate by a psychrotrophic *Pseudomonas fluorescens* (BGW) isolated from subsurface environment 54

R. Montilla, J. Palomar, M.C. Fusté, and M. Viñas Taxonomy and protein fingerprinting of halophilic *Vibrio* isolates from bivalves of the Ebre delta 64

N. Charland, C.G. D'Silva, R.A. Dumont, and D.F. Niven Contact-dependent acquisition of transferrin-bound iron by two strains of *Haemophilus parasuis* 70

Zerlina M. Naczynski, Chris Mueller, and Andrew M. Kropinski Cloning the gene for the heat shock response positive regulator (Sigma 32 homolog) from *Pseudomonas aeruginosa* 75

Kathleen M. Riederer, Patrick Lawson, Marilyn S. Held, Karen Petrylka, Laurence E. Briski, and Riad Khatib Diagnosis of *Clostridium difficile* associated diarrhea: comparison of three rapid methods employing different markers for detection 88

Raymond J. Turner, Joel H. Weiner, and Diane E. Taylor Neither reduced uptake nor increased efflux is encoded by tellurite resistance determinants expressed in *Escherichia coli* 92

NOTES

Abd El-Raheem R. El-Shanshoury, Mostafa A. El-Sayed, Reda H. Sammour, and Wageeh A. El-Shouny Purification and parital characterization of two extracellular alkaline proteases from *Streptomyces corchorusii* ST36 99

Gary C. Johnson A comparison of the efficacy of six media for isolating wood-decaying Hymenomycetes 104

February / Février

REVIEW / SYNTHÈSE

Bernard R. Glick The enhancement of plant growth by free-living bacteria 109

ARTICLES

Jens Christian Pedersen, Per Hyldebrink Damgaard, Jørgen Eilenberg, and Bjarne Munk Hansen Dispersal of *Bacillus thuringiensis* var. *kurstaki* in an experimental cabbage field 118

Jos M. Raaijmakers, Ientse van der Sluis, Margot Koster, Peter A.H.M. Bakker, Peter J. Weisbeek, and Bob Schippers Utilization of heterologous siderophores and rhizosphere competence of fluorescent *Pseudomonas* spp. 126

J.A. Mackintosh, J.E. Trimble, M.K. Jones, P.H. Karuso, A.J. Beattie, and D.A. Veal Antimicrobial mode of action of secretions from the metapleural gland of *Myrmecia gulosa* (Australian bull ant) 136

Steven W. Wilhelm and Charles G. Trick Effects of vitamin B_{12} concentration on chemostat cultured *Synechococcus* sp. strain PCC 7002 **145**

Eric A. Utt, Jeffery P. Brousal, Lynne C. Kikuta-Oshima, and Frederick D. Quinn The identification of bacterial gene expression differences using mRNA-based isothermal subtractive hybridization **152**

Sophie Untrau-Taghian, Ahmed Lebrihi, Pierre Germain, and Gérard Lefebvre Influence of growth rate and precursor availability on spiramycin production in *Streptomyces ambofaciens* **157**

M.L. Kalmokoff and D.E. Bradley Contractile-tailed bacteriophages adsorb to *Escherichia coli* O128ab lipopolysaccharide that is altered by large plasmids to provide receptors and lipopolysaccharide heterogeneity within the serogroup **163**

Ping Wang and Herb E. Schellhorn Induction of resistance to hydrogen peroxide and radiation in *Deinococcus radiodurans* **170**

S.N. Freer Utilization of glucose and cellobiose by *Candida molischiana* **177**

Jian-Yong He, Leo C. Vining, Robert L. White, Katherine L. Horton, and Janice L. Doull Nutrient effects on growth and armentomycin production in cultures of *Streptomyces armentosus* **186**

NOTES

J.K. Dobranic, J.A. Johnson, and Q.R. Alikhan Isolation of endophytic fungi from eastern larch (*Larix laricina*) leaves from New Brunswick, Canada **194**

James A. Daucher and Noel R. Krieg Pyruvate:ferredoxin oxidoreductase in *Campylobacter* species **198**

Pedro F. Mateos, David L. Baker, Saleela Philip-Hollingsworth, Andrea Squartini, Angelo D.B. Peruffo, Marco P. Nuti, and Frank B. Dazzo Direct in situ identification of cellulose microfibrils associated with *Rhizobium leguminosarum* biovar *trifolii* attached to the root epidermis of white clover **202**

March / Mars

ARTICLES

Janice S. Giles, Harry Hariharan, and Susan B. Heaney The plasmid profiles of fish pathogenic isolates of *Aeromonas salmonicida*, *Vibrio anguillarum*, and *Vibrio ordalii* from the Atlantic and Pacific coasts of Canada **209**

Margarita Beatriz Viejo, Josefina Enfedaque, Joan Francesc Guasch, Santiago Ferrer, and Miguel Regué Protection against bacteriocin 28b in *Serratia marcescens* is apparently not related to the expression of an immunity gene **217**

Qitu Wu, Roger Knowles, and Donald F. Niven Effect of ionophores on denitrification in *Flexibacter canadensis* **227**

T. Ueda, Y. Suga, N. Yahiro, and T. Matsuguchi Genetic diversity of N_2-fixing bacteria associated with rice roots by molecular evolutionary analysis of a *nifD* library **235**

Jin-ichiro Takano, Kouichi Kaidoh, and Naoki Kamo Fructose transport by *Haloferax volcanii* **241**

P.L. Sholberg, A. Marchi, and J. Bechard Biocontrol of postharvest diseases of apple using *Bacillus* spp. isolated from stored apples **247**

M. Nicole, H. Chamberland, D. Rioux, X. Xixuan, R.A. Blanchette, J.P. Geiger, and G.B. Ouellette Wood degradation by *Phellinus noxius*: ultrastructure and cytochemistry **253**

L. Létourneau, J.-G. Bisaillon, F. Lépine, and R. Beaudet Spore-forming bacteria that carboxylate phenol to benzoic acid under anaerobic conditions **266**

J.W. May and J.M. Mitchison Pattern of polar extension of the cell wall in the fission yeast *Schizosaccharomyces pombe* **273**

D. Wynne and T. Bergstein Ben-Dan The effect of light and phosphate concentrations on phosphatase activities of the photosynthetic bacterium *Chlorobium* spp. **278**

G.A. Dickie and C.R. Bell A full factorial analysis of nine factors influencing in vitro antagonistic screens for potential biocontrol agents **284**

NOTES

Hans-W. Ackermann, Sadazo Yoshino, and Seiya Ogata A *Bacillus* phage that is a living fossil **294**

Laura A. Vanderberg, Brian L. Burback, and Jerome J. Perry Biodegradation of trichloroethylene by *Mycobacterium vaccae* **298**

Aharon Oren and Peter Gurevich Diversity of lactate metabolism in halophilic archaea **302**

April–May / Avril–Mai

ARTICLES

Xiaowen Liao, Leo C. Vining, and Janice L. Doull Physiological control of trophophase–idiophase separation in streptomycete cultures producing secondary metabolites **309**

Kevin H. Oshima, Tammy T. Evans-Strickfaden, Anita K. Highsmith, and Edwin W. Ades The removal of phages T1 and PP7, and poliovirus from fluids with hollow-fiber ultrafilters with molecular weight cut-offs of 50 000, 13 000, and 6000 316

M. Bellal, S. Benallaoua, L. Elfoul et R. Bonaly Différences structurales des peptidomannannes pariétaux chez le *Kluyveromyces lactis*, entre souches floculante et non floculante 323

Malcolm Dye, Leif Skøt, Lance R. Mytton, Stephen P. Harrison, John J. Dooley, and Ann Cresswell A study of *Rhizobium leguminosarum* biovar *trifolii* populations from soil extracts using randomly amplified polymorphic DNA profiles 336

C. David Boyle Development of a practical method for inducing white-rot fungi to grow into and degrade organopollutants in soil 345

Leena Chakravarty, Thomas J. Zupancic, Beth Baker, Joseph D. Kittle, Ilona J. Fry, and Olli H. Tuovinen Characterization of the pTFI91-family replicon of *Thiobacillus ferrooxidans* plasmids 354

Izumi Kubo, Isao Karube, Toshifumi Takeuchi, Masako Furusawa, Yoshiko Arikawa, and Takahiro Kanagawa A biosensor based on *Thiobacillus thioparus* for measuring thiosulfate and methanethiol 366

João P.S. Cabral Viability and respiratory activity of *Pseudomonas syringae* cells starved in buffer 372

Jennifer L. Zantinge, Éva Nagy, J. Brian Derbyshire, and Peter J. Krell Analysis of fowlpox virus DNA replication and mapping 378

Edwin H. Battley A reevaluation of the thermodynamics of growth of *Saccharomyces cerevisiae* on glucose, ethanol, and acetic acid 388

Santiago Hernández-Allés, Sebastián Alberti, Xavier Rubires, Susana Merino, Juan M. Tomás, and Vicente J. Benedí Isolation of FC3-11, a bacteriophage specific for the *Klebsiella pneumoniae* porin OmpK36, and its use for the isolation of porin-deficient mutants 399

Helen K. Lindley, V. Jayne Deeble, Ursula Peschke, Mary O'Neill, Simon Baumberg, and Jonathan Cove Dependence on reporter gene of apparent activity in gene fusions of a *Streptomyces griseus* streptomycin biosynthesis promoter 407

NOTES

Kasthuri Venkateswaran, Toshihiro Hoaki, Misako Kato, and Tadashi Maruyama Microbial degradation of resins fractionated from Arabian light crude oil 418

Y. Huang, J.A. Robertson, and G.W. Stemke An unusual rRNA gene organization in *Mycoplasma fermentans* (*incognitus* strain) 424

Glenn J. Merkel, Barbara A. Scofield, Frederick J. Rescorla, Rong Yang, and Jay L. Grosfeld Reduced recovery of a *Cryptococcus neoformans* adherence mutant from a rat model of cryptococcosis 428

Jon H. Connolly, Ying Chen, and Jody Jellison Environmental scanning electron microscopic observation of the hyphal sheath and mycofibrils in *Postia placenta* 433

M. Diaz-Diaz, O.P. Ward, J. Honek, and G. Lajoie Enzymes from *Pseudomonas* sp. strain NCIB 11097 participating in biotransformation of acetaldehyde and glycine to threonine isomers 438

June / Juin

ARTICLES

Weizhen Tang, J.J. Pasternak, and Bernard R. Glick Persistence in soil of the plant growth promoting rhizobacterium *Pseudomonas putida* GR12-2 and genetically manipulated derived strains 445

Martina Celerin, Alan W. Day, Alan J. Castle, and David E. Laudenbach A glycosylation pattern that is unique to fimbriae from the taxon Microbotryales 452

Kamtin Leung, Jack T. Trevors, and Hung Lee Survival of and *lacZ* expression in recombinant *Pseudomonas* strains introduced into river water microcosms 461

D. Trzesicka-Mlynarz and O.P. Ward Degradation of polycyclic aromatic hydrocarbons (PAHs) by a mixed culture and its component pure cultures, obtained from PAH-contaminated soil 470

Loren Launen, Linda Pinto, Christine Wiebe, Eberhard Kiehlmann, and Margo Moore The oxidation of pyrene and benzo[*a*]pyrene by nonbasidiomycete soil fungi 477

N. Mezrioui, K. Oufdou, and B. Baleux Dynamics of non-O1 *Vibrio cholerae* and fecal coliforms in experimental stabilization ponds in the arid region of Marrakesh, Morocco, and the effect of pH, temperature, and sunlight on their experimental survival 489

N.A. Patterson and M. Kapoor Developmentally regulated expression of heat shock genes in *Leptosphaeria maculans* 499

Oswaldo Garcia, Jr., Jerry M. Bigham, and Olli H. Tuovinen Oxidation of galena by *Thiobacillus ferrooxidans* and *Thiobacillus thiooxidans* 508

S. Nemec Stress-related compounds in xylem fluid of blight-diseased citrus containing *Fusarium solani* naphthazarin toxins and their effects on the host 515

S. Peter Howard and Heather G. Meiklejohn Effect of mutations in the general secretory pathway on outer membrane protein and surface layer assembly in *Aeromonas* spp. 525

NOTES

Bernard R. Glick, Damir M. Karaturovíc, and Peter C. Newell A novel procedure for rapid isolation of plant growth promoting pseudomonads **533**

Fumiaki Taguchi, Naoki Mizukami, Tatsuo Saito-Taki, and Katsushige Hasegawa Hydrogen production from continuous fermentation of xylose during growth of *Clostridium* sp. strain No. 2 **536**

Sangpen Chamnongpol, Paiboon Vattanaviboon, Suvit Loprasert, and Skorn Mongkolsuk Atypical oxidative stress regulation of a *Xanthomonas oryzae* pv. *oryzae* monofunctional catalase **541**

Malkit Azachi, Yigal Henis, Aharon Oren, Peter Gurevich, and Shlomo Sarig Transformation of formaldehyde by a *Halomonas* sp. **548**
